```
// Question 1: Student Grading System

// 1. Student information
const firstName = "Emmanuel";
const lastName = "Anyakoha";
const subject1Score = 45;
const subject2Score = 38;
const subject3Score = 30;

// 2. Calculate total score (arithmetic
operator +)
const totalScore = subject1Score +
subject2Score + subject3Score;

// 3. Determine remark (conditional
statement + logical operator &&)
let remark;

if (totalScore >= 70) {
  remark = "Excellent";
} else if (totalScore >= 50 && totalScore
<= 69) {
  remark = "Good";
} else if (totalScore >= 35 && totalScore
<= 49) {
  remark = "You can do better";
} else {
  remark = "Fail";
}
```

```
// 4. Display results
const fullName = firstName + " " +
lastName;

console.log("===== EXAMINATION RESULT
=====");
console.log("Student Name : " + fullName);
console.log("Subject 1    : " +
subject1Score);
console.log("Subject 2    : " +
subject2Score);
console.log("Subject 3    : " +
subject3Score);
console.log("Total Score  : " +
totalScore);
console.log("Remark       : " + remark);
console.log("==============================
");
```
